

Demonstration of Proposed Features

Date	03 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document records the key features proposed for the **Rising Waters – Intelligent Flood Prediction and Early Warning System** and confirms their successful implementation and demonstration. The application uses a Decision Tree Machine Learning model to predict flood risk based on historical weather and rainfall data through a user-friendly Flask web application.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Home Page	Displays project overview and navigation	Implemented	Yes	Working successfully
2	Weather Data Input	Allows users to enter weather parameters	Implemented	Yes	Input validation included
3	Flood Prediction	Predicts Flood/No Flood using the Decision Tree model	Implemented	Yes	Prediction accuracy: 96.55%
4	Prediction Result	Displays prediction outcome and safety recommendations	Implemented	Yes	Results displayed correctly
5	Machine Learning Integration	Loads the trained Decision Tree model for prediction	Implemented	Yes	Model integrated successfully
6	Responsive User Interface	User-friendly interface for desktop and mobile devices	Implemented	Yes	Responsive design verified

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
